

Bova UK Specials are proud to announce they are sponsoring the 9th year of **Vets with Horsepower (VwHP)**. Professor Derek Knottenbelt and his dedicated team of 11 specialised vets and support crew will be in Spain and Portugal in July this year. The team consists of Dr. Jessica Kidd, Professor Roger Smith, Dr. David Bardell, Dr. Caroline Hahn, Dr. John Burford, Dr. Jenny Croft, Dr. Sanne Wilmink, Dr. Dietrich Von Schweinitz, Dr. Andy Crawford (potentially), Dr. Deon Van Tonder, and Mr Trevor Croft (Chief Navigator).

They will deliver Continued Professional Development (CPD) lectures to vets at eight locations in ten days. On Paper it sounds so simple. It's not, they face scorching heat and many thousands of miles to travel. Previous tours have witnessed lots of dramas including broken legs, broken head gaskets and stolen passports, it's certainly not a holiday. The dedication and determination of the team means that they have raised millions to provide equipment and support to a wide variety of charities worldwide. This year VwHP will be raising money for the following charities:

- Saving the Survivors (caring for African poaching victims and helping to stop further poaching)
- the Gambia Horse and Donkey trust (veterinary care and education for those working equids and their owners that need it desperately)
- the Mozambique vet school (educating the future generation of veterinarians)
- Tiny Ticklers (infant heart disease charity)
